DoOpenMenu

<<throws>>
Receiver: class!

<<finals>>-form
Command

#<<finals>> display

Receiver → Menu

commands

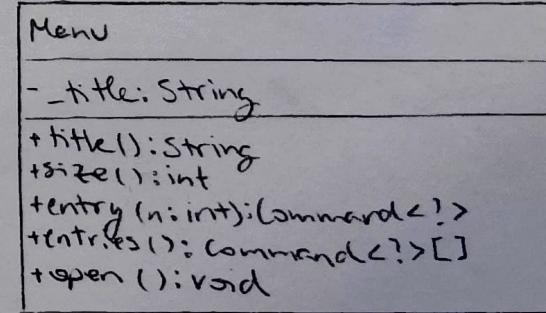

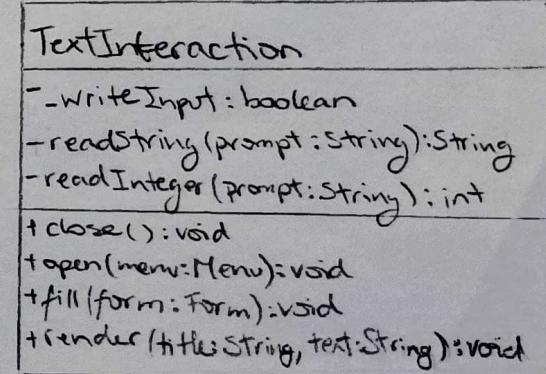

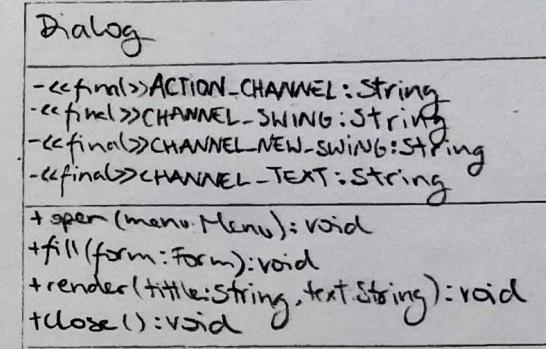

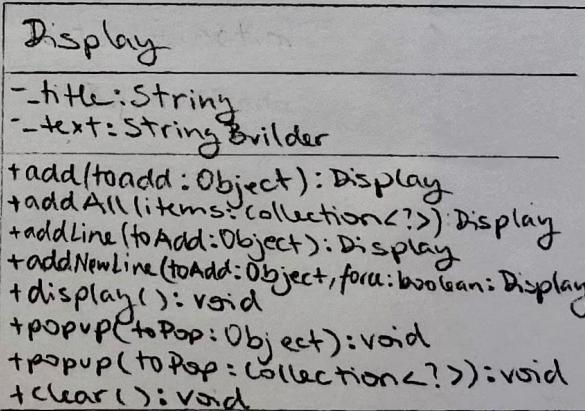

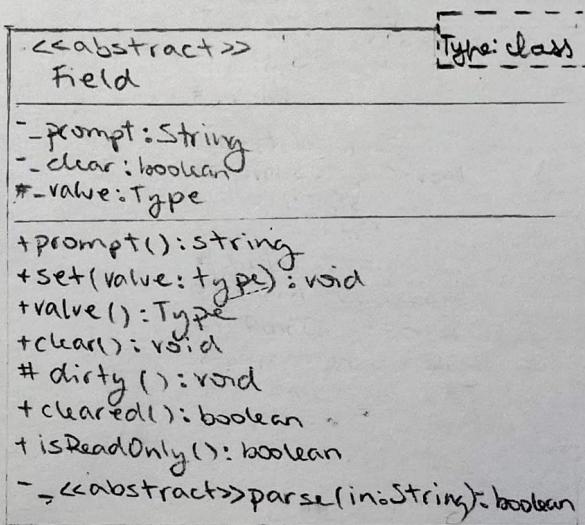

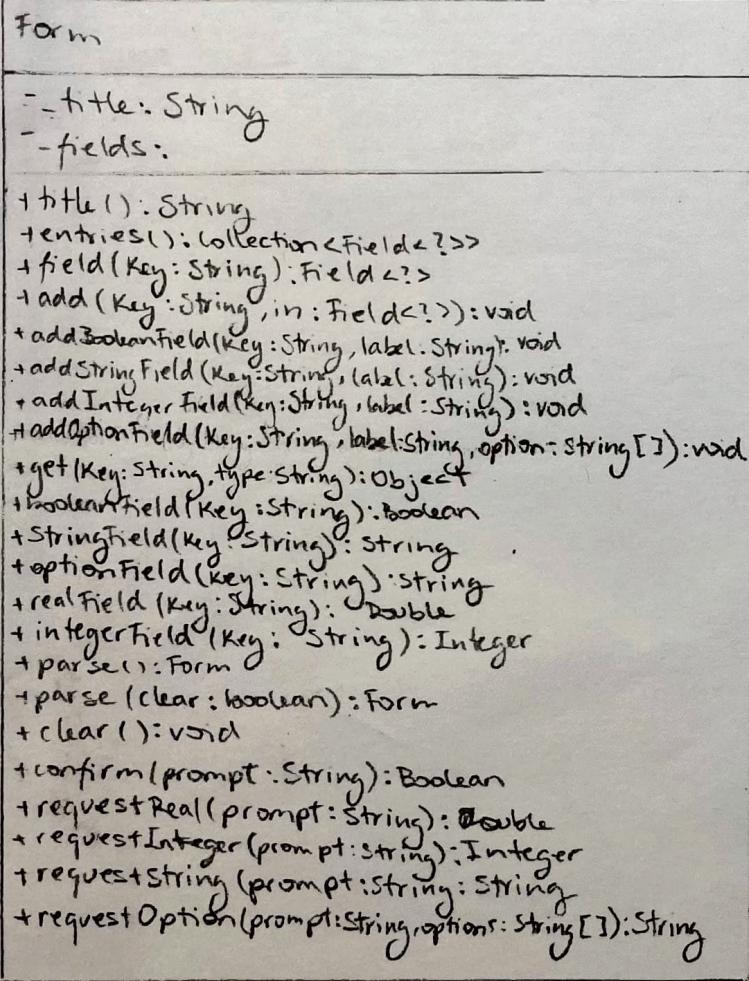

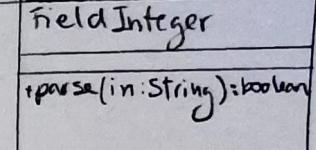

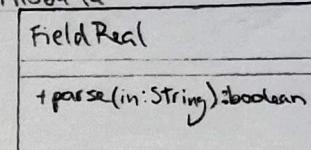

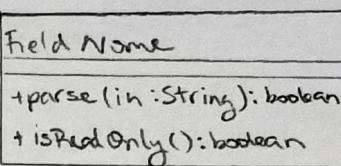

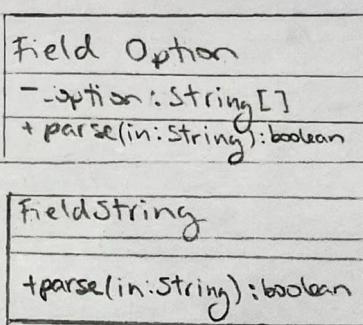

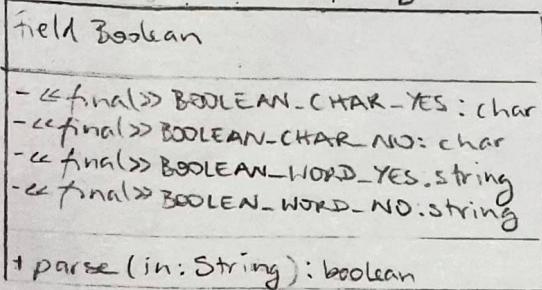

Menu

#- valid
<<binds>>
T → Receiver

The "equals" and "toString" methods have been excluded because they are inherited from the Object class. Additionally, getters and setters have been omitted. Class serial numbers have also been left out. The classes Message, Messages, Prompt and Properties have been excluded as they are specific to the implementation and do not contribute to the overall project structure.

The fields and methods of such non-empty class are documented on the other pages of this document.
